Aesculap signs long-term distribution agreement with Human Xtensions

Aesculap AG, a subsidiary of B. Braun Melsungen AG, and Human Xtensions Ltd., have signed an agreement for the European distribution of Human Xtensions minimally invasive surgery platform called HandX™. From now on it enhances the expanding portfolio of B. Braun and Aesculap in Europe. The simplified surgical system integrates all the components required for flexible bedside laparoscopic and endoscopic procedures.

HandX is the first in a series of game changing modular handtop solutions by Human Xtensions, combining the robust capacity of advanced software with state of the art miniaturized technology with the ease and accessibility of handheld devices. It is a modular platform designed to translate the surgeon's hand motions into complex movements inside the patient's treated area. It also enables the surgeons to move naturally as they stand by their patient's bedside. The affordability, modularity, and simplicity enable hospitals to swap open surgery with minimal invasive surgery (MIS) and to improve laparoscopic techniques, which expedites patient recovery and improve outcomes.

New smart solutions such as HandX are important additions to our portfolio, aimed at meeting complex medical challenges. It can significantly contribute to the surgical landscape, promoting effective medical experiences for both doctors and patients “, says Dr. Joachim Schulz, Chairman of the Executive Board of Aesculap. „We see a lot of synergies with our existing laparoscopic activities and in particular in combination with our 3D visual platform EinsteinVision.“

Dr. Tami Frenkel, Co-Founder, Chairman and CEO of Human Xtensions: „We are honored to partner with Aesculap, a market leader with a portfolio of innovative medical products. We are joined by our mutual commitment to propel surgery into a new era, where smart technology can expedite the shift of traditional practices into what we, at Human Xtensions, call Artefficient Surgery.“

About B. Braun

With 64.000 employees in 64 countries, B. Braun is one of the world's leading manufacturers of medical devices and pharmaceutical products and services. Through constructive dialog, B. Braun develops high quality product systems and services that are both evolving and progressive - and in turn improves people's health around the world. In 2018, the Group generated sales of €6.9 billion.

About Human Xtensions

Human Xtensions is a medical device company, focusing on reinventing minimal invasive surgery (MIS) with disruptive handtop technology. Founded in 2012 with the vision of making MIS a smart art, Human Xtensions is headquartered in Israel and led by a multidisciplinary team of professionals that bring the best of all worlds, from medicine to technology, and from ergonomics to design. Human Xtensions catalyzes an entirely new medical reality called Artefficient Surgery, with personalized digital platforms that combine the power of state of the art advanced technologies with the ease and affordability of hand-held solutions.
